

Test Summary Report

Booking.com — Car Rental Section (New York)

Project	Booking.com Car Rental Search
Module Under Test	Cars / Pick-up Location: New York
URL	https://www.booking.com/cars/index.html
Test Phase	System / End-to-End Testing
Duration	May 4, 2026 – May 13, 2026
Author	Dmytro Radchenko
Report Date	May 14, 2026
Overall Status	Conditional Pass

Executive Summary

Functional, UI, compatibility, and basic non-functional testing was performed on the Car Rental search and booking flow on Booking.com using New York pick-up locations (JFK Airport, LaGuardia Airport, Newark Airport, and Manhattan downtown). Out of 84 planned test cases, 80 were executed: 71 passed, 9 failed, and 4 were blocked. No critical defects remain open. The release is recommended with conditions: 2 high-severity defects related to currency conversion and date-picker behavior on Safari must be fixed before production rollout.

Test Execution Metrics

Test Case Statistics

Metric	Count	Percentage
Total Test Cases	84	100%
Executed	80	95.2%
Passed	71	88.8%
Failed	9	11.2%
Blocked	4	4.8%
Not Executed	0	0%

Coverage Metrics

Coverage Type	Value	Notes
Feature Coverage	94%	Search, filters, sort, booking, payment forms
Requirements Coverage	97%	29 of 30 requirements verified
Risk Coverage	90%	High and medium risks fully covered

Coverage Type	Value	Notes
Browser Coverage	100%	Chrome, Firefox, Edge, Safari
Device Coverage	85%	Desktop and iOS / Android mobile web

Test Environment

Item	Details
Application	Booking.com Cars (production-like staging)
Browsers	Chrome 124, Firefox 126, Edge 124, Safari 17.4
Devices	Windows 11, macOS 14, iOS 17, Android 14
Pick-up Locations	JFK, LGA, EWR, Manhattan (NY, USA)
Currencies Tested	USD, EUR, UAH
Languages Tested	English (US), German, Ukrainian
Test Tools	Manual + Postman (API), DevTools, BrowserStack

Defect Summary

Defect Statistics by Severity

Severity	Total	Open	Fixed & Verified	Deferred
Critical	1	0	1	0
High	3	2	1	0
Medium	5	1	3	1
Low	4	1	2	1
TOTAL	13	4	7	2

Critical & High Defects

ID	Severity	Summary	Status
BCR-101	Critical	Booking confirmation not displayed after successful payment (JFK pickup)	Closed
BCR-104	High	Currency switch from USD to EUR shows stale total on results page	Open
BCR-108	High	Date picker disables valid return dates on Safari 17.4	Open
BCR-112	High	Driver age filter (Under 25) not applied to LGA results	Closed

Known Issues & Workarounds

Issue	Workaround
BCR-104: Stale total on currency change	Re-trigger search after switching currency
BCR-108: Safari date picker	Use Chrome or enter dates manually via keyboard
BCR-119: Map view occasionally flickers on zoom	Reload page; defect deferred to next sprint

Quality Assessment

Exit Criteria Status

Exit Criterion	Target	Actual	Status
Test case execution	>= 95%	95.2%	Met
Pass rate (executed cases)	>= 90%	88.8%	Not Met
No open Critical defects	0	0	Met
Open High defects	<= 1	2	Not Met
Requirements coverage	>= 95%	97%	Met
Performance: search response (p95)	< 3.0s	2.6s	Met

Quality Risks & Mitigations

Risk	Impact	Mitigation
Open High defects on currency conversion and Safari date picker	Booking abandonment for EU and Apple users	Hotfix before release; add monitoring on currency-change events
Limited load testing on peak NY airport pickup hours	Possible slowdown during summer peak	Schedule dedicated load test for weeks 21-22
Third-party supplier API (Hertz, Avis) intermittently slow	Search results delay above 3s	Add timeout fallback and cached supplier list

Recommendations

1. Release Recommendation

Conditional Pass. Approve release after fixing BCR-104 (currency stale total) and BCR-108 (Safari date picker). Both must be retested and signed off by QA before production deployment.

2. Action Items

#	Action	Owner
1	Deliver fixes for the 2 open High defects within 3 business days	Development
2	Execute regression on Search, Filters, Booking and Payment flows	QA
3	Add automated checks for currency conversion totals to the regression suite	QA Automation
4	Re-run cross-browser smoke pack on Safari after the fix	QA

3. Follow-up Testing Needs

#	Activity
1	Performance / load test against NY airport pick-up locations during peak hours
2	Accessibility audit (WCAG 2.1 AA) for the booking funnel
3	Localization re-test for new languages (FR, ES) once added
4	Negative testing for blocked driver-age and license combinations

Sign-off

Role	Name	Decision	Date
QA Lead	Dmytro Radchenko	Conditional Pass	2026-05-14
Product Owner	—	Pending	—
Release Manager	—	Pending	—
